

DINOS KLENTZERIS

Columbus, NJ | 856.524.1337 | dinos.k007@gmail.com | [linkedin.com/in/dinos-klentzeris](https://www.linkedin.com/in/dinos-klentzeris)

PROFESSIONAL SUMMARY

Cybersecurity professional with an M.S. in Cyber Security and two plus years of hands-on SOC and security engineering experience. Proven ability to monitor, detect, and respond to threats across endpoint, network, and email vectors using industry-standard SIEM, EDR, and firewall platforms. Competitive CTF participant with practical penetration testing and digital forensics skills.

EDUCATION

M.S. Cyber Security

Graduated May 2025

Rowan University

Focus Areas: Threat Detection, Threat Response Operations, Computer Forensics, Cyber Defense

B.A. Computing and Informatics

Minor: Computer Science | Concentration: Cyber Security Graduated May 2024

Rowan University — Cum Laude

CERTIFICATIONS & COMPETITIONS

- CompTIA Network+ — In Progress (expected 2026)
- Hack The Box, TryHackMe — Advanced labs covering OSINT, web/network exploitation, reverse engineering, and incident response
- National Cyber League (NCL) — National Cybersecurity Competition; disciplines include cryptography, log analysis, and vulnerability scanning
- Digital Forensics Labs — Evidence acquisition, disk imaging, artifact analysis, and timeline reconstruction using FTK Imager, Autopsy/Sleuth Kit, and Nirsoft Suite

PROFESSIONAL EXPERIENCE

GSOC Specialist | *Garda World · Contracted to TD Bank*

Jan 2026 – Present

- Monitor and triage security alerts across CCTV, alarm, and access control systems in a high-stakes, 24/7 global security operations environment
- Analyze inbound security data to identify emerging risks, escalate incidents, and support coordinated threat mitigation responses
- Author detailed incident logs and comprehensive security reports to maintain audit-ready documentation and inform leadership decisions
- Collaborate cross-functionally with physical and cyber security teams to ensure a unified security posture

Systems Security Engineer / SOC Analyst | *Pro Computer Services (PCS, LLC)*

May 2023 – Nov 2025

- Monitored and analyzed security events across endpoints, networks, and firewalls using SIEM and MDR platforms including Binary Defense, UniFi, FortiCloud, and FortiGate to detect and respond to threats in real time
- Investigated phishing emails, suspicious logins, and malware alerts by correlating logs, validating indicators of compromise (IOCs), and escalating confirmed incidents per defined runbooks
- Led endpoint protection investigations leveraging SentinelOne and Microsoft Defender, triaging high-fidelity alerts and driving end-to-end incident remediation
- Improved phishing detection rates and reducing false positives through tuning mail security gateway and flow rules
- Supported incident response operations targeting advanced persistent threat (APT) activity, through forensic log analysis and coordinated remediation tracking

- Configured and managed firewall rules, IDS/IPS policies, and OS patch cycles to maintain network security and regulatory compliance
- Conducted asset inventory reviews, vulnerability assessments, and compliance checks to support risk management reporting
- Developed internal cybersecurity awareness and training materials, reducing user-driven security incidents and promoting a security-first culture

Junior Gameplay Engineer | *WYLD Innovations*

2019 – 2023

- Developed and QA-tested interactive applications across web, desktop, mobile, VR, and AR platforms — building transferable skills in scripting, systems debugging, and structured testing
- Scripted game logic and authored 2D/3D scenes in Unity3D; managed version control workflows using Git and GitHub
- Configured microcontrollers and sensors for hardware-software integration projects, strengthening low-level systems understanding

TECHNICAL SKILLS

SIEM / MDR	Binary Defense, FortiCloud/FortiGate, UniFi, Microsoft Sentinel (exposure)
Endpoint (EDR)	SentinelOne, Microsoft Defender
Email Security	Barracuda, Microsoft 365 (MFA, DLP, mail flow rules)
Forensics	FTK Imager, Autopsy / Sleuth Kit, Nirsoft Suite
Networking	TCP/IP, IDS/IPS, Firewall rules, VPN, CompTIA Network+
Cloud / Platform	Microsoft 365, Windows Server, Unix/Linux, Virtualization
Programming	C#, Java
Collaboration	Git, GitHub, Adobe Suite, Microsoft Office Suite
